Percent Slope

- Less than 5% Slope
- 5%-8% Slope
- 8%-10% Slope
- 10%-12% Slope
- 12%-15% Slope
- Greater than 15% Slope

Percent slope represents the maximum rate of change in elevation, using a grid where each cell is 10-by-10 feet in size.

This map was prepared using contour data provided by Cowlitz County developed through interpolation of Washington Department of Natural Resources (WA DNR) 30-foot Digital Elevation Model (DEM) data. The contours were processed in ArcGIS Spatial Analyst to create a 10-foot raster DEM and generate the percent slope layer.
